

1

## Check the price history

Was the 'original' price of Precious Metals Dealers ever actually charged? Look at the typical range, not the crossed-out number.

2

## Compare 3 retailers

Same model and size. Note delivery, returns and warranty next to price.

3

## Add the true total

Shipping, tax, add-ons and fees. Compare totals, not sticker prices.

4

## Stack the savings

Coupons, card offers, cashback and gift-card discounts. Confirm what combines.

5

## Check the fine print

Confirm: dealer reputation and reviews; buyback or resale terms.

## BUY

Total is at or below your target and terms are clear

## WAIT

Price is fair but above target. Set an alert

## SKIP

History looks inflated or terms are unclear

General guide only. Prices, policies and availability vary by seller and change over time.
